

Microsoft Visio 2019/2021: Part 1 (v1.1)

Overview

From the earliest eras of human existence, visual images have been used to represent knowledge, data, and information. Beginning with the Paleolithic cave paintings and continuing to today's most complex computer networks, these images leverage the ability of the human brain to rapidly perceive patterns and trends from visual representations. In today's workplace, visual diagrams are an essential part of communication, from road maps to sales flows to process charts. Microsoft® Visio® provides you with an intuitive, customizable tool to easily create a professional-looking visual product by using its extensive gallery of shapes. By following the exercises in this course, you will create visually engaging diagrams, maps, and drawings, using graphical elements to make information easier to comprehend. This material will benefit users of any current Office version. The classroom environment setup is based on Office 2019.

Prerequisite Comments

To ensure your success, you will need to be familiar with using personal computers, including a mouse and keyboard. You should be comfortable in the Windows 10 environment and proficient in using Windows to access programs, navigate to information stored on the computer, and manage files and folders.

To meet this prerequisite, you can take any one or more of the following Logical Operations courses:

Using Microsoft® Windows® 10

Microsoft® Windows® 10: Transition from Windows® 7
