
Certified Hardware Asset Management Professional (CHAMP)

Overview

Designed to address the numerous issues plaguing professionals in managing hardware assets, the IAITAM Certified Hardware Asset Management Professional (CHAMP) Course follows the lifecycle of IT hardware assets beyond the scope of the cradle to grave analogy and discusses the business practices that can best be used to manage those assets efficiently and cost-effectively. Emphasis is placed on identifying the policies that enhance lifecycle management. In general, policies are only effective if developed by a cross-section of the impacted departments, are reviewed frequently to remain current and are consistently communicated and enforced. The course is followed by a certification test for those that wish to achieve CHAMP certification.

Prerequisite Comments

The CHAMP Course is designed for those individuals with minimal to no experience in the field of Hardware Asset Management. Although there are no prerequisites, some knowledge of contracts and hardware lifecycle management is encouraged.

Online certification testing is available for students starting at 8 AM the day after class finishes; from this point the exam will be open for 14 days. However, it is suggested to take the exam as soon as possible following the course.

Testing requires non-interrupted internet connection and may be taken at any time during the open period; once a test is started, students are required to complete it during that session and are permitted up to 3 hours to complete.

One hundred (100) questions are on the IAITAM CAMP exam and a passing mark is achieved by attaining 85% or higher.

Exam results are available immediately after completing the exam within the IAITAM Exam Center.

One test retake is free of charge for those that fail to achieve pass status on the first attempt; retakes are available after a 24 hour window of the first attempt and must be completed during the 14 day open period. If the second attempt is unsuccessful, the exam may be repurchased at non-member pricing. No discounts apply.

If a student is unable to complete the exam and retake (if needed) within their 14 day window, a one-time seven (7) day extension can be purchased for \$50USD; this option must be completed before the initial 14 day window expires.

If certification is not achieved or exam time frame lapses then students will have one year to purchase the exam again. After one year has expired, the course must be purchased and may be acquired at membership pricing.

Purchase of this course also includes a self-pace edition of Certified Asset Management Professional CAMP course

Target Audience

IT Asset Managers and other IT professionals involved in Asset Management, resource budgeting, finance, software licensing, contract management and strategic planning.

Course Objectives

Students earning a CHAMP certification will see financial benefits of enhanced Hardware Asset Management best practices and uncover many savings opportunities to increase their organizations' bottom line by managing the lifecycle of the hardware asset. They will receive an awareness of several avenues for savings, compliance, global disposal and revenue generation practices for properly managing the lifecycle of hardware assets.

Course Outline

1 - Course Outline
