

Cisco® Implementing an Integrated Threat Defense Solution (SECUR201) v1.2

Overview

The Implementing an Integrated Threat Defense Solution (SECUR201) v1.2 course provides an analysis of the cybersecurity landscape with an emphasis on the importance of an integrated threat defense architecture. Through a combination of lessons and hands-on practice, you will learn to deploy and integrate Cisco®'s Integrated Threat Defense solutions which include: Cisco Identity Services Engine (ISE), Cisco Stealthwatch, Cisco Firepower NGFW, and Cisco AMP for Endpoints. This course provides you with the knowledge and skills to implement and integrate solution components with existing network services, integrate solution components with the pxGrid (Platform Exchange Grid) framework, integrate network and endpoint-based malware protection, and observation of security dataflow after the introduction of malware.

Prerequisite Comments

To fully benefit from this course, you should have the following knowledge:
Technical understanding of TCP/IP networking and network architecture including DNS, SSH, FTP, SNMP, HTTP, and HTTPS
Technical understanding of security concepts and protocols
Familiarity with Cisco ISE, Stealthwatch, Firepower, and AMP

Target Audience

This course is designed for technical professionals who need to know how to deploy a Cisco Integrated Threat Defense solution in their network environment.

Cisco integrators and partners
Systems and network engineers
Technical architects
Technical support personnel

Course Objectives

After taking this course, you should be able to:
Understand the network security landscape and the Cisco Integrated Threat Defense (ITD) solutions
Describe the key components of the ITD solution and their use in the network
Configure the Cisco Identity Services Engine (ISE) for a baseline of operation in the ITD solution
Configure the integration between the Cisco Stealthwatch® and Cisco ISE

[Register Online](#)**Schedule**

Class Length: 2 Days

G2R = "Guaranteed to Run" | OLL = "Online LIVE"
ILT = "Instructor-Led-Training"

This course is not currently available on the public schedule. Please contact us using the information in the footer below to inquire about future dates or to schedule a private class.

platforms

Configure the integration between the Cisco Firepower® and ISE platforms
Configure the integration between Cisco Firepower and Cisco Advanced
Malware Protection (AMP) for Endpoints

Course Outline ---

1 - Course Outline

Integrated Threat Defense Introduction
ITD Products
Identity Services Engine Setup
Integration of Stealthwatch with Identity Services Engine
Integration of Firepower with Identity Services Engine
Integration of Firepower with AMP for Endpoints

2 - Lab outline

Connecting to the Lab Environment
Integrating ISE and Active Directory
Integrating ISE and Cisco Adaptive Security Appliance (ASA)
Configuring pxGrid and Client Certificates
Integrating Stealthwatch with Identity Services Engine
Integrating Network Visibility Module (NVM) with AnyConnect
Integrating Firepower with Identity Services Engine
Integrating AMP for Endpoints with Firepower
